COMPOUND FERTILIZER

# 20-20-5 Special fertilizer for wheat

| | |
|---|---|
| **Document reference** | TDS-20-20-5-SPECIAL-FERTILIZER-FOR-WHEAT |
| **Issue date** | 11 August 2026 |
| **Revision** | 1.3 |
| **Supersedes** | Rev 1.2, 11 August 2026 |

## 1. Product Description

20-20-5 Special fertilizer for wheat is nitrogen-led, directing energy into canopy and vegetative growth; phosphorus-led, supporting root establishment, flowering and early vigour. The analysis supplies 20% nitrogen, 20% phosphorus (as P2O5) and 5% potassium (as K2O). Best applied during vegetative growth - cereals, grasses, leafy vegetables and pasture topdressing where canopy development drives yield. Natures Fertilizer blends this locally, which keeps lead times short and allows the ratio to be matched to a paddock rather than taken off a container.

## 2. Declared Analysis and Specification

| | |
|---|---|
| **Product name** | 20-20-5 Special fertilizer for wheat |
| **Product code** | 20-20-5-SPECIAL-FERTILIZER-FOR-WHEAT |
| **Product family** | Compound Fertilizer |
| **Declared analysis (N–P–K)** | **20–20–5** |
| **Total nitrogen (N)** | 20% |
| **Phosphorus (as $P_2O_5$)** | 20% |
| **Potassium (as $K_2O$)** | 5% |
| **Total nutrient content** | 45% (45 units) |
| **Elemental phosphorus (P)** | 8.7% |
| **Elemental potassium (K)** | 4.2% |
| **Nutrient supplied per tonne** | 200 kg N · 200 kg $P_2O_5$ · 50 kg $K_2O$ |
| **Physical form** | Granular |
| **Water solubility** | Soil-applied granular product |
| **Packaging** | Bulk, one-tonne bulka bag or bagged — confirmed on your quotation |
| **Minimum order** | **10 – 25 MT**, depending on the product and the destination — confirmed on your quotation |
| **Availability** | Australia-wide delivery; international shipping on request |
| **Certificate of Analysis** | Issued on request against your delivered batch |
| **Safety Data Sheet** | Available on request — request it before handling |

## 3. Nutrient Loading

One tonne of 20-20-5 Special fertilizer for wheat supplies **200 kg of nitrogen (N)**, **200 kg of phosphate ($P_2O_5$)** and **50 kg of potash ($K_2O$)**. Total nutrient content is 45 units per 100 kg.

| Rate applied | N supplied | P2O5 supplied | K2O supplied |
|---|---|---|---|
| 50 kg/ha | 10 kg/ha | 10 kg/ha | 2.5 kg/ha |

ABN 99 098 515 283 | Kapunda Rd, Hamilton SA 5373, Australia
Tel 0420 129 507 | WhatsApp +61 485 933 924
info@naturesfertilizerptyltd.com | naturesfertilizerptyltd.com

| Rate applied | N supplied | P2O5 supplied | K2O supplied |
|---|---|---|---|
| 100 kg/ha | 20 kg/ha | 20 kg/ha | 5 kg/ha |
| 150 kg/ha | 30 kg/ha | 30 kg/ha | 7.5 kg/ha |
| 200 kg/ha | 40 kg/ha | 40 kg/ha | 10 kg/ha |
| 250 kg/ha | 50 kg/ha | 50 kg/ha | 12.5 kg/ha |

Indicative conversion only. Application rates must be set against a current soil test and confirmed with a qualified agronomist.

## 4. Typical Application

**Nitrogen-led growth with supporting nutrition**

Nitrogen leads this analysis, so it targets vegetative growth, but the phosphorus and potassium alongside it mean the crop is not left short elsewhere while the canopy builds. Useful where a straight nitrogen product would create a secondary deficiency.

Compound granule carrying the full declared ratio in each particle.

## 5. Packing and Quantities

| Format | Net weight | Typically used for |
|---|---|---|
| 25 kg bag | 25 kg | Small holdings, trial quantities, hand or small spreader application |
| 50 kg bag | 50 kg | Standard bagged supply for general farm and horticultural use |
| 500 kg bulka bag (FIBC) | 500 kg | Loader or telehandler handling where a full tonne is too much |
| 1,000 kg bulka bag (FIBC) | 1 tonne | The standard broadacre unit — one bag, one lift |
| Bulk | By the tonne | Tipped or augered into your bin or spreader; lowest cost per tonne |

Minimum order is 10 - 25 MT depending on the product and the destination. Exact packing and tonnage are confirmed on your quotation.

## 6. Container Loading (20ft FCL)

| Packing | Loading method | Units per 20ft | Net weight |
|---|---|---|---|
| 25 kg bags | Floor loaded (loose stacked) | 1,000 bags | 25 MT |
| 25 kg bags | Palletised, 40 bags per pallet, shrink-wrapped | 20 pallets / 800 bags | 20 MT |
| 50 kg bags | Floor loaded (loose stacked) | 500 bags | 25 MT |
| 50 kg bags | Palletised, 20 bags per pallet, shrink-wrapped | 20 pallets / 400 bags | 20 MT |
| 500 kg bulka bags | Floor loaded, two tiers | 40 – 50 bags | 20 – 25 MT |
| 1,000 kg bulka bags | Floor loaded, single tier | 20 – 25 bags | 20 – 25 MT |
| Bulk | Loaded into a container liner bag | — | 25 – 27 MT |

Fertiliser is a dense cargo: a 20ft container reaches its weight limit at roughly 25-27 tonnes while still only part full, so a 40ft box offers no usable gain. Shipping in 20ft containers is standard and is normally the cheaper freight per tonne.

## 7. Handling and Storage

Store dry, off the ground and out of direct weather. Nitrogen and ammonium-based fertilisers are hygroscopic: they draw moisture from the air and will cake or set hard if left exposed. Keep bags closed until use, rotate stock, and do not stack beyond the height the packaging is rated for. Avoid contamination with other chemicals.

**Request the Safety Data Sheet for this product before it is handled.** The SDS covers hazard classification, personal protective equipment, first aid and spill response, and it must be accessible to everyone who handles, transports or stores the product.

## 8. Supply and Documentation

**Disclaimer.** The analysis stated in this data sheet is the nominal specification for this product. It is not a guarantee of the composition of any particular consignment. Where a Certificate of Analysis is issued for a delivered batch, that certificate governs and takes precedence over this document. This data sheet is technical product information and is not agronomic advice; fertiliser selection and application rates depend on soil type, moisture, crop, rotation and season, and should be confirmed with a qualified agronomist. This document is not a Safety Data Sheet.
