

MACRO ELEMENT WATER SOLUBLE FERTILIZER

19-19-19+TE Macro Element Water soluble fertilizer

Document reference	TDS-19-19-19-TE-MACRO-ELEMENT-WATER-SOLUBLE-FERTILIZ
Issue date	11 August 2026
Revision	1.3
Supersedes	Rev 1.2, 11 August 2026

1. Product Description

19-19-19+TE Macro Element Water soluble fertilizer is a balanced ratio that supplies nitrogen, phosphorus and potassium in equal measure, suiting general-purpose feeding across a full season. The analysis supplies 19% nitrogen, 19% phosphorus (as P₂O₅) and 19% potassium (as K₂O), plus a trace element package covering the common micronutrient deficiencies. Suited to general application across cereals, pasture, vegetables and tree crops where no single nutrient is limiting. It dissolves fully for fertigation and foliar programs, making it suitable for drip, pivot and boom delivery without residue. Produced to order at Natures Fertilizer's Australian blending facility, so the specification can be tuned to the crop and soil rather than fixed by an import run.

2. Declared Analysis and Specification

Product name	19-19-19+TE Macro Element Water soluble fertilizer
Product code	19-19-19-TE-MACRO-ELEMENT-WATER-SOLUBLE-FERTILIZ
Product family	Macro Element Water soluble fertilizer
Declared analysis (N-P-K)	19-19-19
Total nitrogen (N)	19%
Phosphorus (as P ₂ O ₅)	19%
Potassium (as K ₂ O)	19%
Total nutrient content	57% (57 units)
Elemental phosphorus (P)	8.3%
Elemental potassium (K)	15.8%
Nutrient supplied per tonne	190 kg N · 190 kg P ₂ O ₅ · 190 kg K ₂ O
Physical form	Soluble crystal / powder
Water solubility	Fully water soluble
Packaging	Bulk, one-tonne bulka bag or bagged — confirmed on your quotation
Minimum order	10 – 25 MT , depending on the product and the destination — confirmed on your quotation
Availability	Australia-wide delivery; international shipping on request
Certificate of Analysis	Issued on request against your delivered batch
Safety Data Sheet	Available on request — request it before handling

3. Nutrient Loading

One tonne of 19-19-19+TE Macro Element Water soluble fertilizer supplies **190 kg of nitrogen (N)**, **190 kg of phosphate (P₂O₅)** and **190 kg of potash (K₂O)**. Total nutrient content is 57 units per 100 kg.

Rate applied	N supplied	P2O5 supplied	K2O supplied
50 kg/ha	9.5 kg/ha	9.5 kg/ha	9.5 kg/ha
100 kg/ha	19 kg/ha	19 kg/ha	19 kg/ha
150 kg/ha	28.5 kg/ha	28.5 kg/ha	28.5 kg/ha
200 kg/ha	38 kg/ha	38 kg/ha	38 kg/ha
250 kg/ha	47.5 kg/ha	47.5 kg/ha	47.5 kg/ha

Indicative conversion only. Application rates must be set against a current soil test and confirmed with a qualified agronomist.

4. Typical Application

General-purpose and maintenance nutrition

The three major nutrients are supplied in broadly comparable proportions, which makes this a maintenance and general-purpose analysis. It suits situations where a soil test shows no single nutrient dominating the deficiency, and where the aim is to replace what the previous crop removed.

Fully water-soluble, formulated for fertigation, injection and foliar programs.

5. Packing and Quantities

Format	Net weight	Typically used for
25 kg bag	25 kg	Small holdings, trial quantities, hand or small spreader application
50 kg bag	50 kg	Standard bagged supply for general farm and horticultural use
500 kg bulka bag (FIBC)	500 kg	Loader or telehandler handling where a full tonne is too much
1,000 kg bulka bag (FIBC)	1 tonne	The standard broadacre unit — one bag, one lift
Bulk	By the tonne	Tipped or augered into your bin or spreader; lowest cost per tonne

Minimum order is 10 - 25 MT depending on the product and the destination. Exact packing and tonnage are confirmed on your quotation.

6. Container Loading (20ft FCL)

Packing	Loading method	Units per 20ft	Net weight
25 kg bags	Floor loaded (loose stacked)	1,000 bags	25 MT
25 kg bags	Palletised, 40 bags per pallet, shrink-wrapped	20 pallets / 800 bags	20 MT
50 kg bags	Floor loaded (loose stacked)	500 bags	25 MT
50 kg bags	Palletised, 20 bags per pallet, shrink-wrapped	20 pallets / 400 bags	20 MT
500 kg bulka bags	Floor loaded, two tiers	40 – 50 bags	20 – 25 MT
1,000 kg bulka bags	Floor loaded, single tier	20 – 25 bags	20 – 25 MT
Bulk	Loaded into a container liner bag	—	25 – 27 MT

Fertiliser is a dense cargo: a 20ft container reaches its weight limit at roughly 25-27 tonnes while still only part full, so a 40ft box offers no usable gain. Shipping in 20ft containers is standard and is normally the cheaper freight per tonne.

7. Handling and Storage

Store dry, off the ground and out of direct weather. Nitrogen and ammonium-based fertilisers are hygroscopic: they draw moisture from the air and will cake or set hard if left exposed. Keep bags closed until use, rotate stock, and do not stack beyond the height the packaging is rated for. Avoid contamination with other chemicals.

Request the Safety Data Sheet for this product before it is handled. The SDS covers hazard classification, personal protective equipment, first aid and spill response, and it must be accessible to everyone who handles, transports or stores the product.

8. Supply and Documentation

Minimum order	10 - 25 MT, depending on product and destination
Delivery	Australia-wide - every state and territory
Export	International shipping worldwide, quoted per container
Certificate of Analysis	Issued on request against your delivered batch
Safety Data Sheet	Available on request
How to order	Enquiry and written quotation only - no online ordering or payment
Payment	Bank transfer only - EFT within Australia, T/T (telegraphic transfer) for export. Terms are stated on your quotation.
Bank details	Issued on our invoice only. We never change account details by email alone - verify by phone before transferring funds.
